Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear how the opening means 4 is effective to release liquid into the applicator tip. In figure 1, it appears that when the opening means 4 is opened, liquid 3 would flow toward the right, out of the tubular housing 2 and away from tip 5.
